

Good Morning to My Artist Friends

If you ask yourself how to make your paintings 'Stand Out From the Rest' and... 'Come Alive with "Drama" these informative classes will give you those answers!

Designed for the intermediate or advanced painters, these comprehensive lessons will lay the ground work for creating dynamic works of art. You will not only see the 'what and how', I accomplish these paintings with a variety of techniques, but you will be able to practice these techniques right away!

My secret to success has always been to have many visual guides 'tried and practiced' before I do my final painting. These class topics, each with their own unique and special purpose, have all helped to make my art what it is today.

Whether you need to 'loosen-up' ~ 'understand value arrangements' ~ 'create drama and excitement' ~ 'design better compositions' ~ 'paint parts of the landscape differently' ~ 'have brighter, cleaner colors' (etc). you will now learn step-by-step on how to accomplish them. These classes will be so inspiring that you will be eager to practice as soon as the class ends.
