

Good Morning to My Artist Friends!

If you ask yourself how to make your paintings 'Stand Out From the Rest' and... 'Come Alive with "Drama" these informative classes will give you those answers!

Designed for the intermediate or advanced painters, these comprehensive lessons will lay the ground work for creating dynamic works of art. You will not only see the 'what and how', I accomplish these paintings with a variety of techniques, but you will be able to practice these techniques right away!

My secret to success has always been to have many visual guides 'tried and practiced' before I do my final painting. These class topics, each with their own unique and special purpose, have all helped to make my art what it is today.

Whether you need to 'loosen-up' ~ 'understand value arrangements' ~ 'create drama and excitement' ~ 'design better compositions' ~ 'paint parts of the landscape differently' ~ 'have brighter, cleaner colors' (etc). you will now learn step-by-step on how to accomplish them. These classes will be so inspiring that you will be eager to practice as soon as the class ends.

Sign up for the special MONTHLY price of \$149.00. . . or

Choose any individual class at \$65.000 per class when seperated.

To register for the February 2021 classes listed below, go to:

ALL CLASSES will be held from 11:00-2:00 PM CST.

Saturday, February 13, 2021

'Painting Sunset Landscapes'

Be amazed as you watch the transformation of an ordinary scene evolve into a glowing sunset landscape.

This class will open up new horizons as Tom will take you through this process. After this class, nice and ordinary will leave your vocabulary and the glow and warmth of the sunset will add extraordinary drama and excitement to your future paintings.

Tuesday, February 16 2021

'Waterfalls, Mist, Rain & Fog'

The power of painting special effects of the atmosphere will be the unique feature and focus of this class.

Several demonstrations covering each topic will be explained in detail. Tom will show you multiple ways to paint each segment.. Learn how your paintings using these techniques, will now give to the viewer 'feelings' of the subject.

Friday, February 19, 2021

'Oceans, Waves & the Coastal Shoreline'

The 'Coastal Landscape' and its shoreline presents a special challenge to the artist.

Tom will paint the ocean, the water patterns, the power of the wave, the breakers, and the curl and crashing waves over the rocks, and wet/dry sand along the coastal shoreline. With step-by-step examples and great explanation, you will come away with a vast amount of knowledge in capturing the impression of the many items.
